

Client: Whiting Oil & Gas

Project: Fracking Ponds A & B

BENCHMARK HIGHLIGHTS

Scope/Summary – There was no site power for the pump station at fracking ponds. We installed an 18KV Genset with load bank at Pond A and a 15KV Genset with load bank at pond B to provide site power for 4-7 MGD pump stations. Both are equipped with ATS switches to change from primary to secondary power source.

- Conduit Install
- Grounding
- Testing & Commissioning
- Pond A – 800 Amp Primary Disconnect
- Pond B – Install 600 Amp Disconnect for Generator Power and a 400 Amp Disconnect for Load Bank Testing

Benchmark Project Management

- Dave Aguiar – PM
- Superintendent – Mike Stephens

Notable Features

- Pump Stations
- Fracking water supply ponds
